

Accipiter Radar introduces the latest Evolution of the World's ONLY 360° 3D Avian Radar

- ✓ 360° 3D coverage with latitude, longitude and height estimates for all targets tracked requiring just a single radar to do it affordably
- ✓ Improved coverage and target location accuracy achieved via multi-beam 3D antenna system
- ✓ Successfully tested using remote controlled aircraft designed to mimic birds in terms of RCS and movement
- ✓ Greatly reduces ground clutter
- ✓ Only system with height information over 360°
