

PRESS RELEASE

Accipiter Radar Delivers Maritime Radar System for Port of San Diego

August 25, 2026
San Diego, CA, USA
For Immediate Release

Accipiter Radar, a North American industry leader in the development and deployment of smart surveillance solutions for use in homeland security and public safety applications, has been awarded a contract by the Port of San Diego to provide an integrated maritime radar system for situational awareness of maritime traffic operating in and around the San Diego Bay. Accipiter's innovative radar technologies were competitively selected for this project.

Mark Vilardo, Accipiter's US Managing Director was quoted as saying: "We are delighted to be bringing high-impact value to the Port of San Diego on this important project and delivering critical technology to assist with the security and safety of the Port of San Diego and the greater San Diego area."

Accipiter works with various US and Canadian authorities enhancing safety and security on an on-going basis. "We understand the complexities of surveillance, particularly over vast maritime areas" adds Tim J. Nohara, Accipiter's CEO, "and the need for protecting public privacy, which is why we continuously innovate our radar solutions, which are non-identifying, in order to respond to the changing demands placed on our security and safety practitioners who work to keep us safe. Helping these men and women who protect us to succeed is at the core of everything we do at Accipiter."
